

LOTUS launches a virtual fair open to all!

We are very excited to share with you the **LOTUS 3D virtual fair (virtual exposition)**, provided by **ENRICH GLOBAL** to showcase **LOTUS technologies worldwide!**

Visit our LOTUS fair and take the **opportunity to learn more about the project and its main results** such as the **LOTUS box**, the **LOTUS sensor**, **other LOTUS solutions** and our **successful use cases**.

Our online environment enables **up to 25 people to visit the online fair where we have showcased our work virtually!** The 3D environment is accessible through any web browser (except Safari and preferably Google Chrome) and it provides:

- **Navigation within the LOTUS virtual space environment:** move around with

your avatar and visit the fair just as you would do in real life!

- **3D objects:** get a closer look at the LOTUS sensor and the LOTUS box.
- **Meeting functionality:** meet with the LOTUS team or other visitors with video, screen sharing, chat, etc.
- **Interactive posters and videos:** learn more about what was achieved since the project's launch in 2019 thanks to numerous information on the project and its results available.
- **Audio zone management:** discuss with other participants as you are touring around the fair or isolate yourself to discuss bilaterally in the dedicated zones.
- **Resource download:** something caught your attention? Download one of the various resources linked to the project.

This tool will remain available after the end of the project, until the end of 2024.

It is accessible [here](#) or through the QR code below.

Please use the following guidelines to enter and live the complete experience of the LOTUS virtual fair: [here](#).
